

Jeeva G

Computer Science Student | Full-Stack Developer | ML Enthusiast

Chennai, India priyagovinth2019@gmail.com 6369235064 linkedin.com/in/jeevain github.com/jeeva2470041

SUMMARY

Second-year M.Tech (Integrated) Computer Science student at SSN College of Engineering (CGPA: 8.01) with a strong focus on solving real-world problems through practical, scalable solutions. Adaptable and quick to learn new technologies, with proven ability to perform in fast-paced, deadline-driven environments. Currently advancing skills in machine learning and system design while seeking internship opportunities to contribute effectively from the outset.

TECHNICAL SKILLS

Languages: Java, Python, C, JavaScript, SQL, Dart
Frontend: React.js, HTML, CSS, Flutter
Backend: Node.js, Firebase
Databases: MongoDB, MySQL, Neo4j
AI / ML: TensorFlow, CLIP, FAISS
Tools: Git, GitHub, GitLab

PROJECTS

PayTrace | *Python, ML, Kotlin* 2025 GitHub

- Developed an automated UPI expense tracker that parses SMS and push notifications from 5+ payment apps (Google Pay, PhonePe, Paytm) to eliminate manual data entry.
- Implemented ML-based transaction categorization achieving 92%+ accuracy, with interactive spending visualizations that reduced user expense-tracking effort by approximately 80%.

MediaEval 2025 – NewsImages | *Python, PyTorch, CLIP, FAISS, Stable Diffusion XL* 2025 GitHub

- Built a dual-pipeline image recommendation system processing 8,500+ news articles using CLIP embeddings and FAISS vector search for sub-second semantic retrieval.
- Engineered a fallback pipeline using Stable Diffusion XL to generate editorial-quality synthetic images when no relevant match exists, meeting full MediaEval 2025 submission guidelines.

Agri-Tech | *Flutter, Dart, TensorFlow Lite, Firebase* 2025 GitHub

- Designed an offline-first mobile application for rural farmers featuring AI-driven crop disease detection via on-device TensorFlow Lite inference with 90%+ classification accuracy.
- Integrated government scheme discovery engine with eligibility filtering, optimized for low-bandwidth environments.

EcoFeed | *React.js, Node.js, MongoDB, Express.js* 2025 GitHub

- Architected a full-stack food waste reduction platform with location-based matching algorithm connecting surplus food donors to 50+ nearby NGOs and orphanages.
- Implemented real-time WebSocket notifications and an impact tracking dashboard measuring meals redistributed and waste prevented.

HACKATHONS & ACHIEVEMENTS

- Winner** – St. Joseph College Hackathon (2025): Developed PayTrace, selected as best project among 50+ teams.
- Finalist** – SIH NATPAC (2025): Built a consent-based travel data collection app with ML auto-labeling for NATPAC.
- Participant** – Google TechSprint (2025): Developed Campus share platform

EDUCATION

M.Tech (Integrated) CSE	Sri Sivasubramaniya Nadar College of Engineering (SSN)	CGPA: 8.01	2024 – 2029
Class XII	Aditya Vivekanandha Matric Higher Secondary School	94.67%	2024
Class X	Aditya Vivekanandha Matric Higher Secondary School	95%	2022

CERTIFICATIONS

NPTEL – Privacy and Security in Online Social Media | **Google TechSprint** – Participation Certificate

EXTRACURRICULAR ACTIVITIES

Coding Club (Member) – SSN College of Engineering | Active participant in inter-college hackathons and tech fests
